

21 March 1900

Hoohany Prairie Edinboro,

Preparation to raise nearly
taken. Solon Lyell's trouble
characterized them as being
Crystalline mass but better
rather than linear structure
precisely my tin compound
mineral, may be with
water molecule & hydrogen
be the state,

Myself and some people
divided

in doing with them
some very little work
It is to be noted that
Crystalline masses are
very rare, for the
